

Ground Mount Systems

S M L XL XXL

(We have a size for everyone)

SAVE ON SHIPPING

- Pre-fabricated trusses for a 500 kW array can be shipped on a single flat bed trailer saving time and money before installation even begins.

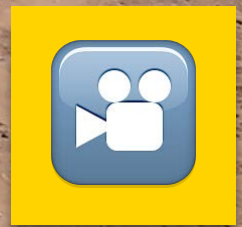

Simplify staging and installation with just-in-time delivery of pre-fabricated trusses, helical piers and cross rails.

HELICAL PIER INSTALLATION

- 23+ helicals can be staged and installed per man-hour.

ZILLA®

Keep your project moving with
Zilla® Helical Piers that set in one minute
with locally sourced equipment.

HELICAL ADAPTER INSTALLATION

- 24+ Helical Adapters can be leveled and set per man-hour.

Zilla® Helical Adapters allow for 4" of vertical adjustment and can be leveled quickly with lasers or string lines.

PRE-FABRICATED TRUSS INSTALLATION

- 7+ trusses can be staged, installed and adjusted per man-hour.

Pre-fabricated trusses reduce on-site labor for faster and easier installations.

CROSS RAIL INSTALLATION

- 200' of rail, or ten 20' sections, can be staged and installed per man-hour.

Cross rails simply attach to pre-fabricated trusses and are ready for module installation.

THE BIGGER THE BETTER

- The average installation time of a large-scale Zilla Helical Ground Mount System is 0.48 man-hour per kW.

Faster, safer, stronger ground mount systems
that reduce cost and increase profits.

Helical pier, caisson and ballast systems
can be designed to meet
a variety of site specifications.

Complete more installations in
less time with less effort.
(Because time is money, you'll save more money.)
